Tips

Entry Exit System

You can zoom in/out, move the image itself, inside its allocated position by using the crop tool:

- Select an image / shape format menu / click on the crop tool > you will see the entire image appear
- Adapt / reposition your image as you want it to appear > click on the crop button again when you are done (making sure position of the image box didn’t move) and it’s a wrap!

A blue transparent gradient has been prepared on the slide’s side; Should it be needed for a better readability of the text, it can be placed on top of the image by swiping it to the left.
